

# ASSEMBLY INSTRUCTIONS

Before assembling, read all the instruction

This is a generic illustration and may not be identical to your lamp.

## Important:

Check the lamp socket for information on the maximum wattage recommended for your specific lamp.

## Cleaning of your lamp.

Unplug lamp, wipe with a damp cloth. Do not use abrasives.

## WARNING: Shut off electric power before servicing, installing or replacing the light bulb.

The electrical installation must be done in accordance with the installation rules. If you are not familiar with this standard, please consult a professional electrician.

## Install the lamp

- \*The lamp must be firmly attached to the ceiling using fasteners(metal hook or ring, screws and nuts).
- \*Connect the wires to the terminals on the casing(see diagram below.) Before connecting the wires, make sure the power is shut off. This lamp is a class I and must be connected to ground.

- \*Connect the yellow and green conductor on the screw indicated by the ground symbol.
- \*Make sure the wires do not come into contact with any hot parts of the lamp.
- \*Do not turn the power back on until installation is complete.
